

RoPro College Challenge Camp

For students going into 11th grade,
12th grade or newly graduated
July 15, 16, & 17, 2009, 9am - 5pm
University of Texas at Arlington

We've got a challenge for you!

Join us at the **RoPro College Challenge Camp** this summer and we will challenge you NOT to have built both a robot and a college application by the time you leave camp!

Over the course of 3 days, Dr. Huber and his team will set you a robot challenge to complete and compete by the end of camp. At the same time Dr. Tiernan and her colleagues will prep you for the challenge of successfully applying to the college of your choice including talks on how to apply for financial aid and scholarships, how to write application essays, how to put together a resume or experience history, and how to apply online to UTA.

You'll walk away with a great robot experience and a great preparation for sending out those college applications.

The cost for the **RoPro College Challenge Camp** including lunches is a \$35 dollar registration fee. All students will leave the camp with at least one completed college application and the knowledge you need to successfully apply to all your colleges of choice.

Join us for three days of challenge at
2008 RoPro College Challenge Camp

For information about camp and registration, contact

Dr. Carter Tiernan, tiernan@uta.edu, 817-272-0113
or visit <http://www.cse.uta.edu/robots/> and use the camp link
